**Application:** Great for basic area lighting of a room or space. The 3" reflector trims produce a low, bright illumination with a choice of reflector and trim ring color combination. The clear reflector produces a maximum light output while minimizing the source. The black reflector creates a "hidden" effect that obscures the glare of the lamp. All of the color choices create an outstanding general illumination that is suitable in both residential and light commercial applications.

**Mounting** Steel pressure springs mounted on trim to ensure positive retention inside housing.
