Square Flanged or Trimless
Wall Wash
1,000lm - 2,400lm
(15 - 22W)

Application

Although not required, the frame allows for support for the downlight in weak ceilings such as tiles and locations where a rough-in frame is desired for new construction applications.

Mounting

Housing suitable for new construction installations. Adjusts up to 3/4" ceiling thickness. Supplied with (2) 24" adjustable hanger bars. Hanger bars equipped with nail-less install 3/4" serrated barbed studs and with captive nails, for faster and easier secure mounting in wood joists. Set-screws lock into position and prevent shifting after installation. Trim is secured via positive retention friction clips.
