

# LITON / DALUME : BUY AMERICAN PROVISIONS INFORMATION

**LITON**  
**DALUME**  
by LITON

Under the 1933 Buy American Act and the 2009 American Recovery and Reinvestment Act (ARRA), the **Buy American Provisions** stated restrictions on where goods or supplies can be manufactured. This refers to goods and supplies made for public use or purchased with public funding.

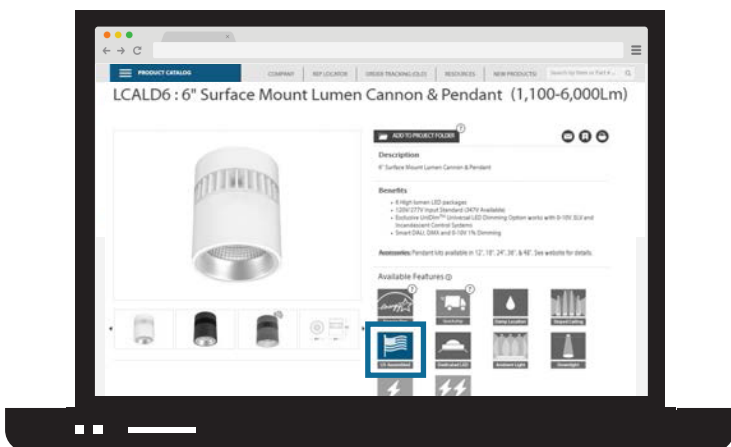

**LITON Lighting, and Dalume** understand these provisions and offer many products that comply with the restrictions. As well, many of our products that are being sold domestically, are made or assembled in our factory in the United States.

LITON, and Dalume are pleased to provide lighting solutions for indoor and outdoor lighting for residential, commercial, and architectural applications that adhere to the Buy American Provisions.

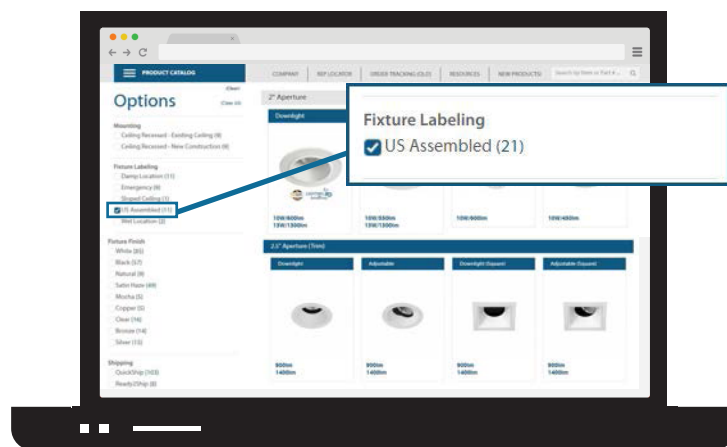

If a product is made or assembled in the United States, it will feature one of these icons on its product page. This icon will always show up under “Available Features” for each product that is US Assembled.

This is a screenshot of an example product that lists the US Assembled icon under features.

The highlighted icon indicates that this product was assembled or made in the United States.

There are filter options on the side of every category page. Check the option “US Assembled” to display all products that were assembled or made in the United States.
