INSTALLATION INSTRUCTIONS for LPCMDLQ4 Series Accessory READ AND UNDERSTAND ALL INSTALLATION INSTRUCTIONS BEFORE INSTALLING FIXTURE! SAVE THESE INSTRUCTIONS

installing LED fixture(s)/LED driver(s).

Outdoor Installation for Covered Ceiling Mount only (Damp or Wet Location)

- Danger: Always disconnect power before wiring, or maintenance. Fixture must be installed by a qualified electrician. Do not install in locations where water collects and/or stands for prolonged periods of time. Fixture must always be installed according to local and national electrical codes, rules & regulations. Fixture must be installed on a circuit protected by Ground Fault Circuit Interrupter (GFCI).
- Warning: The joint MUST be sealed between the mounting surface (e.g., wall, ground, ceiling, etc.) and the fixture with an appropriate sealing / caulking compound to provide a watertight seal. Seal all conduit opening(s) and opening(s) from water entry. Before service ensure fixture is cool to touch. Always ensure that all gaskets and sealing surfaces are free of dirt and debris.

LED fixture(s), LED driver(s) and LED electrical components are more precise electrically than standard non LED products (e.g. Incandescent, Compact Fluorescent, H.I.D., etc.). Please follow the following guidelines /requirements when

Indoor Installation for Covered Ceiling Mount only (Dry or Damp Location) Important: Please read and understand all instructions completely before installing this fixture.

WARNING: Fixture installation (and use) and all electrical connections must be in accordance with local and National Electrical Codes (N.E.C.) rules, regulations and standards. If you are unfamiliar with installing fixture(s), accessories and/or electrical wiring have a qualified licensed electrician install this fixture for you. Fixture should be installed by a qualified electrician.

WARNING: RISK OF SHOCK. House electric current can cause painful shock or serious injury. WARNING: Always disconnect power before fixture installation, wiring, or maintenance. WARNING: Before starting the wire connections, disconnect the power by turning off the circuit breaker or removing the fuse at the fuse panel. Turning the power off using the light switch is not sufficient to prevent electrical shock.

This luminaire must be connected with supply wire/conductors rated at 90°C. Most dwellings built before 1985 have supply wire rated at 60°C; consult a qualified electrician before installing.

WARNING: Before service insure fixture is cool to touch.

WARNING: Check fixture for input voltage before connecting power to fixture.

- 1. Install LED fixture(s) and/or LED driver(s) only on their own circuit. Do not mix any other non LED products/fixtures (e.g., Incandescent, Compact Fluorescent, H.I.D., etc.) with LED fixture(s)/LED driver(s) on a single circuit
- 2. Do not use any other electrical equipment (e.g., surge protectors, photocells, etc.) that is not (rated) for use with LED fixture(s)/LED driver(s) on the same circuit as LED fixture(s)/LED driver(s).
- 3. Use GFCI's (by others) on each circuit (per installation instructions) appropriate for the installation.
- 4. Install remote surge protector(s) (by others, goes on the circuit with nothing between the surge protector and the LED fixture(s)/LED driver(s)), if the fixture in not already installed with a surge protector, to help remove power surges that may harm LED fixture(s), appropriate for the installation. Periodically check and make sure that your remote surge protector(s) are in good working order.

WARNING: RISK OF SHOCK. This fixture is suitable for dry and damp locations. For covered ceiling mount only.

WARNING: Do not install any fixture or assembly (etc.) closer than 6" from any curtain, or similar combustible material.

Fixture must be installed on a circuit protected by Ground Fault Circuit Interrupter (GFCI).

Install LED fixture(s)/LED driver(s) only on their own circuit. Do not mix any other products (Incandescent, Compact Fluorescent, H.I.D. products/fixtures, etc...) with LED fixture(s)/LED driver(s) on a single circuit.

Do not use any other electrical equipment (example: surge protector photocell, etc.) that is not (rated) for use with LED fixture(s)/LED driver(s) on the same circuit as LED fixture(s)/LED driver(s).

Install remote surge protector(s) (by others, goes on the circuit with nothing between the surge protector and the LED fixture(s)/LED driver(s)), if the fixture is not already installed with a surge protector, to help remove power surges that may harm LED fixture(s), appropriate for the installation. Periodically check and make sure that your remote surge protector(s) are in good working order.

 Assemble the Stem in the Stem Assy (FIG. 1) through the Square Plate threads making sure that the stem does not go below the threads in square plate (see above right detail). Tighten securely using Large Hex Nut.

Install LED fixture(s)/LED driver(s) only on their own circuit. Do not mix any other products (Incandescent, Compact Fluorescent, H.I.D. products/fixtures, etc...) with LED fixture(s)/LED driver(s) on a single circuit.

Do not use any other electrical equipment (example: surge protector photocell, etc.) that is not (rated) for use with LED fixture(s)/LED driver(s) on the same circuit as LED fixture(s)/LED driver(s).

Install remote surge protector(s) (by others, goes on the circuit with nothing between the surge protector and the LED fixture(s)/LED driver(s)), if the fixture is not already installed with a surge protector, to help remove power surges that may harm LED fixture(s), appropriate for the installation. Periodically check and make sure that your remote surge protector(s) are in good working order.

WARNING: Check fixture for input voltage before connecting fixture wires to wires in the stem. 4. Loosen (4) M4 screws from DLQ340 Housing (TOP) and remove

- DLQ340 Housing (TOP) from DLQ340 Housing (BOTTOM). 5. Feed wires/cord from Stem Assy (FIG 3) through Plug in Housing (TOP).
- 6. Connect wire/conductors in the stem assembly to the fixture wires (ground wire green or bare copper to screw/connector from the fixture, neutral (common) wire in the stem to the neutral wire from the fixture and the line/lead wire in the stem to the line (lead)
- wire from the fixture). For Dimming wiring see Liton web site. 7. Secure connection using UL Listed wire nuts/connectors and then with UL Listed Electrical tape (rated minimum 90°C) (by others, as required), appropriate for the connection.
- 8. Screw M4 screws through Housing (TOP) (& keep gasket in place) into Housing (BOTTOM) and tighten securely to seal out water entry into fixture. Do not over tighten screws.

WARNING: Check fixture for input voltage (and write/record input voltage down) before continuing to step #9 below.

- 9. Place fixture housing over Mounting Plate (MP) and align both holes in DLQ340 Top Housing with tapped holes in Square Plate.
- 10. Tighten Phillips head screw through housing in 3-1/4" Round Plate (with screwdriver) until screw is tight in housing. Do not over tighten screws.

WARNING: Check fixture for input voltage before connecting power to fixture. Connect wiring in j-box. 11. Connect the power supply wiring (from j-box) to fixture wiring (in Stem Assy) in j-box. See 11a-11e below.

- 11a) Connect ground wire (green or bare copper/aluminum) from the supply circuit to the ground wire (green or bare copper) /screw/connector from the luminaire.
- 11b) Connect the neutral (common) wire from the power supply to the neutral wire from the luminaire.
- 11c) Connect the main voltage supply wire (line/lead) from the power supply to the line (lead) wire from the luminaire.
- 11d) Secure connection using UL Listed wire nuts/connectors and then with UL Listed Electrical tape (by others), as required, appropriate for the connection.
- 11E). For Dimming wiring see Liton web site.
- 12. Secure Canopy Mounting Bracket (CMB) to Covered Ceiling J-BOX (by others) using J-BOX hardware (by others).
- 13. Secure Stem Assy (with DL340 attached) to Canopy Mounting Bracket (CMB) by putting Adjustable Canopy up through 8-32 threaded studs in Canopy Mounting Bracket (CMB) and secure tightly with supplied two (2) Cap Nuts. Hang fixture straight down. J-box can be on a ceiling sloaped/tilted to 75° maximum 01262018
